## 18DD1908

## M. Sc. EXAMINATION, 2020

(Fourth Semester)
(C Scheme)
(Main Only)
MATHEMATICS
MAT618C
Operations Research

Time : 3 Hours]
[Maximum Marks : 75

Before answering the question-paper candidates should ensure that they have been supplied to correct and complete question-paper. No complaint, in this regard, will be entertained after the examination.

Note : Attempt Five questions in all, selecting one question from each Unit. Q. No. 9 is compulsory. All questions carry equal marks.

## Unit I

1. Define LPP. Discuss unbounded and infinite solution in Graphical Method. Solve the LPP by Graphical Method :

Min. $Z=20 x_{1}+10 x_{2}$
Subject to
and

$$
\begin{aligned}
x_{1}+2 x_{2} & \leq 40 \\
3 x_{1}+x_{2} & \geq 30 \\
4 x_{1}+3 x_{2} & \geq 60
\end{aligned}
$$

$$
x_{1}, x_{2} \geq 0
$$

2. Use the simplex method to solve the following LPP :

Max. $Z=3 x_{1}+5 x_{2}+4 x_{3}$
Subject to

$$
\begin{aligned}
2 x_{1}+3 x_{2} & \leq 8 \\
2 x_{1}+5 x_{3} & \leq 10 \\
3 x_{1}+2 x_{2}+4 x_{3} & \leq 15 \\
x_{1}, x_{2}, x_{3} & \geq 0
\end{aligned}
$$

## Unit II

3. Given below is the unit cost array with supplies $a_{i}(i=1,2,3)$ and demand $b_{j}(j=1,2,3,4):$

|  |  | Sink |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | $\mathbf{1}$ | $\mathbf{2}$ | $\mathbf{3}$ | $\mathbf{4}$ | $a_{i}$ |
| Source | $\mathbf{1}$ | 8 | 10 | 7 | 6 | 50 |
|  | $\mathbf{2}$ | 12 | 9 | 4 | 7 | 40 |
|  | 9 | 11 | 10 | 8 | 30 |  |
| $b_{j}$ | 25 | 32 | 40 | 23 | 120 |  |
|  |  | Or |  |  |  |  |

Find the optimal solution to the above Hitchock problem.
4. Solve the following minimal assignment problem :

Job

|  |  | 1 | 2 | 3 | 4 | 5 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | A | 8 | 4 | 2 | 6 | 1 |
|  | B | 0 | 9 | 5 | 5 | 4 |
| Problem | C | 3 | 8 | 9 | 2 | 6 |
|  | D | 4 | 3 | 1 | 0 | 3 |
|  | E | 9 | 5 | 8 | 9 | 5 |

## Unit III

5. Derive EOQ model for deterministic demand when repenishment rate in infinite and shortages are permitted.
6. Define Inventory. What are the advantages and disadvantages of having inventories ?

## Unit IV

7. Explain, how Gomory's cutting lane algorithm works. $\mathbf{1 5}$
8. Use the Kuhn-Tucker conditions to solve the follwing N.L.P. problem :

15
Maximize $Z=7 x_{1}^{2}-6 x_{1}+5 x_{2}^{2}$
Subject to
and

$$
\begin{array}{r}
x_{1}+2 x_{2} \leq 10 \\
x_{1}-3 x_{2} \leq 9 \\
x_{1}, x_{2} \geq 0
\end{array}
$$

9. (a) Define Dual Simplex method.
(b) Define Hungarian method.
(c) Explain the following :
(i) Arrival pattern
(ii) Service discipline.
(d) Write the Kuhn-Tucker condition for NLPP.
